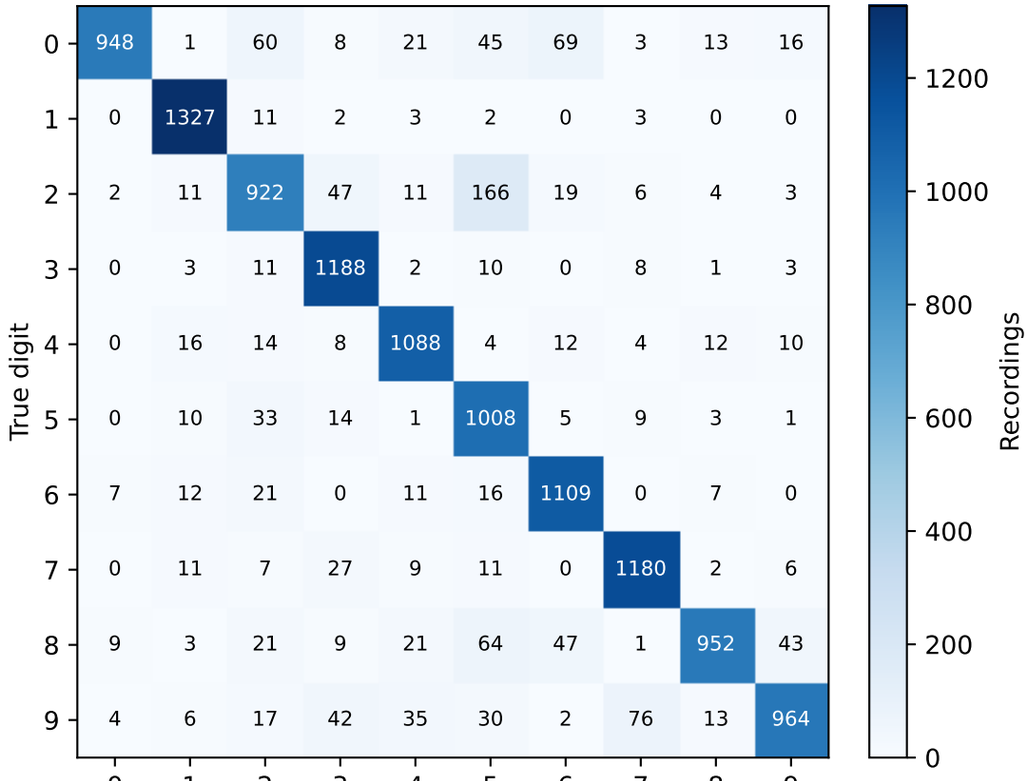
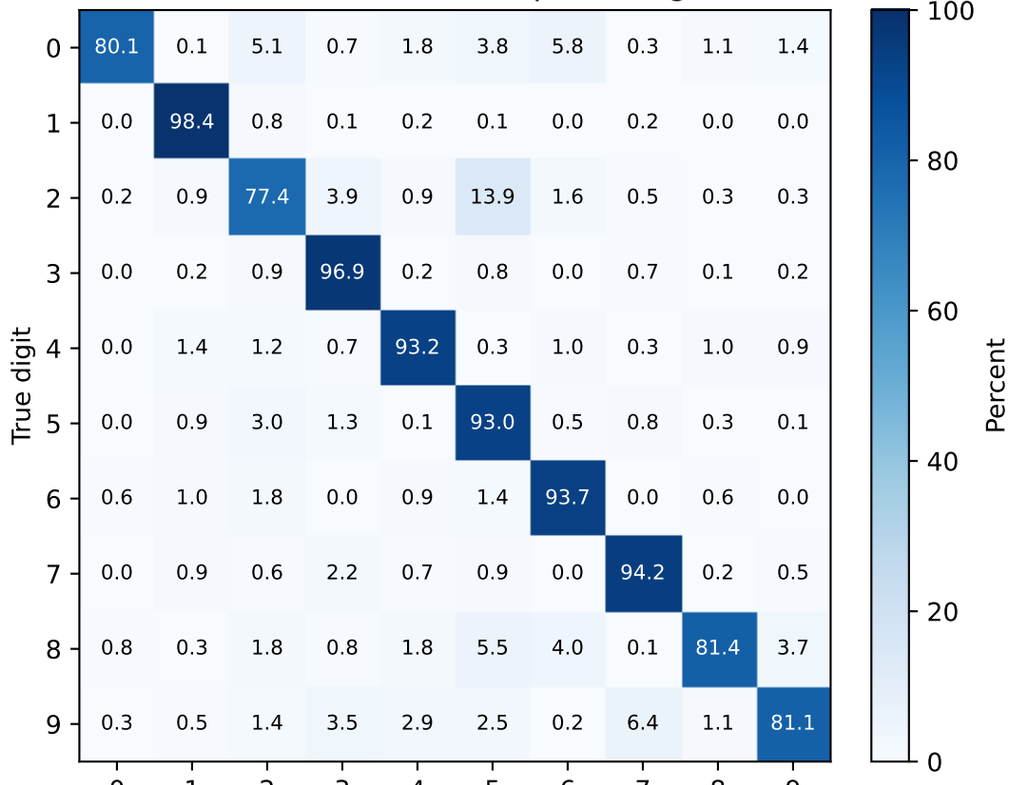
QIS QNN — classification results

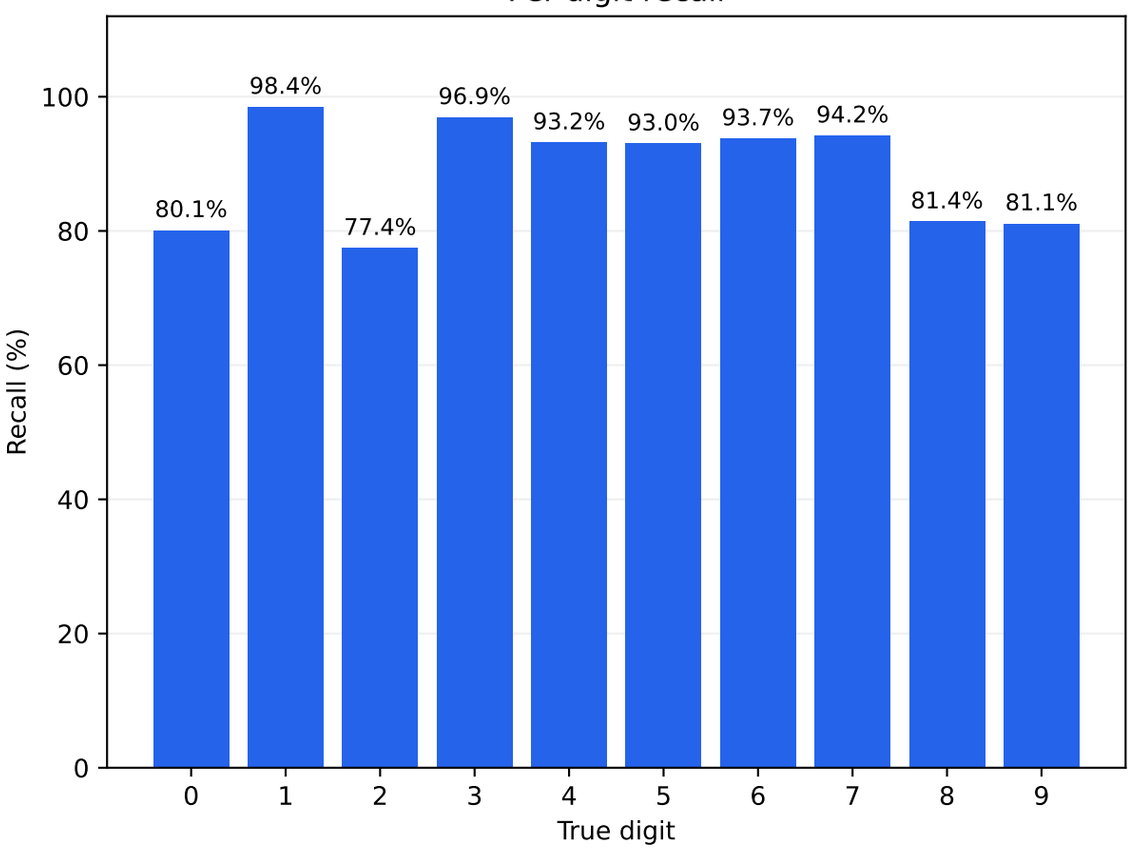
Confusion matrix: counts



Confusion matrix: row percentages



Per-digit recall



Overall results

Recordings evaluated: 11,996
Correct predictions: 10,686
Incorrect predictions: 1,310

Overall accuracy: 89.08%
Mean cross-entropy: 0.3395

One returned prediction per recording.
Recall = correct / total for each true digit.
N/A = no recordings for that digit.
